

Aims and Scope for Journal of Universal Science Online

The *Journal of Universal Science Online* (J. Univ. Sci.) uses double-blind review. This means that both the reviewer and author identities are invisible vice versa, throughout the review process. The journal publishes scholarly and original articles and review articles. JUSO invites new and original contributions with the understanding that, if accepted, they will not be published elsewhere.

The Journal of Universal Science Online is an open-access journal, anyone may view articles and submit manuscripts for publication.

Papers reporting new theories, methods and analysis, modelling and/or important applications in sciences are appropriate for submission to this Journal.

The editors, editorial board members and scholarly reviewers are active scientists with an immense amount of collective experience that is used during the review and revision stages of articles.

The Journal applies the Creative Commons Attribution (CC BY) license to works we publish. Under this license, authors agree to make articles legally available for reuse, without permission or fees, for virtually any purpose. Anyone may copy, distribute or reuse these articles, as long as the author and original source are properly cited.

Open access

This journal offers authors a choice in publishing their research:

- No open access publication fee
- Articles are freely available to the internet without permission

Specific main topics include Life Sciences:

- Biophysics and modelling
- All aspects of chemistry, but preferred analytical and organic chemistry, molecular modeling, except all aspect of geology
- Molecular biology, included: physiology, biochemistry, microbiology, genetics, biotechnology, biologically active molecules, protein and biomolecular structure prediction, modeling
- Medical science: all aspect of experimental result
- Agricultural sciences, primarily experimental aspects of molecular biology and agricultural biotechnology
